MARAZZI
DESIGN

SU MISURA

Paul Marazzi's passion for design, has fashioned a uniquely identifiable style, a fusion of modern and classical influences, creating original design concepts, never seen before, and compiled a library of outstanding and inspired work.

His philosophy is to understand artisan's techniques of the past, and to reinterpret them, using the latest technology and modern day engineering.

A truly bespoke product, where each component is custom made, individually built and finished by hand, offering an unprecedented choice of customised styles, finishes and materials, from 24 carat gold, to the finest wood veneers.

Paul makes it possible to add your own personality, to any of his passionate and luxurious designs, be it a timeless opulence or cutting edge chic.

A kitchen should have a soul and presence, stirring the emotions, celebrating family life and convivial living, transforming the kitchen into the heart and soul of the home.

SU MISURA 19

The clean geometric lines of the equipped columns create an elegant contrast between contemporary practicality and an atmosphere of times gone by, tracing out classic and sought after surroundings.

The central island comfortably organizes the spaces by function. The main activities in the room revolve around the island, with its every practical detail designed with great respect for the minimalist and elegant style of the décor.

SU MISURA 45

Details, such as the base door cut at a 45-degree angle, with the integrated slot in the top and the materials' chromatic contrasts, make the System 45 wood kitchen modern with an antique flavour.

The space is organized in fully equipped suspended cabinets and columns, which decorate the walls with clean, essential lines, drawn from the central island's geometric shape, which continues and extends into the side table.

SU MISURA 25

The kitchen décor that opens up towards the living room creating a unique, ample and functional space, perfect for living. Equipped with all of the tools and conveniences of a contemporary kitchen, it interprets the essential and sober qualities of its forms with lacquered surfaces in materials such as glass and cement.

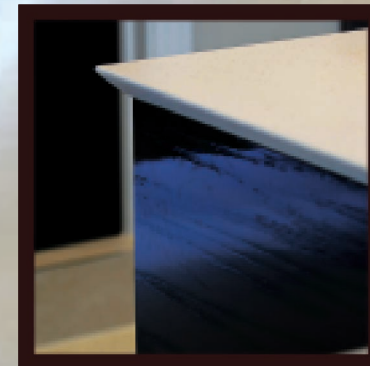

The kitchen space meets the living room in a unique and generous solution. The preparation area melds with that which is usually given over to resting, thus creating a single dimension where the two moments coincide.

SU MISURA 19

Su Mizura's lines are simple and essential. A modern kitchen that meets the needs of contemporary living by interpreting fast and dynamic rhythms and at the same time creating a tranquil and welcoming space. Function and elegance side by side in the kitchen.

The polished steel plinth and light create the illusion of the island being elevated from the floor. Dark Anthracite lacquered oak veneer of the island contrasts the light work surface extending to the dining area giving the space a unique minimalist look.

MATERIALS

Marazzi Su Misura materials are rich, rare and of high quality. The blending of different materials such as, for example, leather, marble and cement, gives character to the surfaces, which depending on tastes and requirements, may be further customized with special textures.

The on-demand door is the distinctive feature of the Su Misura kitchen. Customized to the customer's requirements, it can be built at 19 or 25 mm thicknesses or cut at 45 degrees giving a perfect, comfortable fit in a minimalist style.

FINISHES

Marble

Wood

Metal

Leather

Gold & Silver Leaf

Corian & Cement

There are many, many finishes available, including different materials, colours and treatments, for custom installations. All share excellent quality and solidity, ensuring a high value kitchen, both functionally and aesthetically, which will last for years to come.

Su Misura manages and organizes space efficiently and flexibly, thanks to its adaptable and multi-use solutions. The sophisticated details and finishes give a highly sought and elegant character to these workspaces.
